Create a Game Instructions

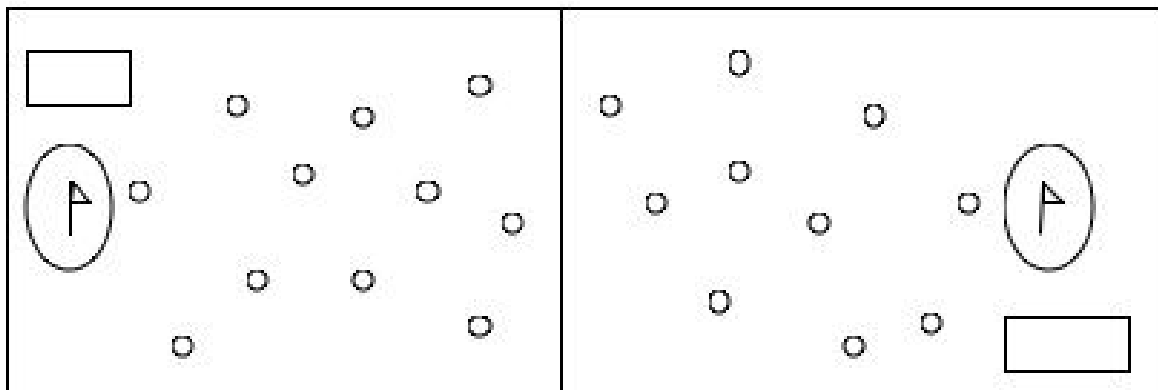

(At Home Edition)

Students will create their own PE game to be played at home. You can create a brand new game or use a variation of a game you already know. You can incorporate elements from a specific sport, a game from PE, a backyard game, or something completely new!

Be as creative as you want, but you must follow the rules below.

Rules:

1. Must be a game played at your home with items available to you (no need to purchase anything).
2. Must be school appropriate and played with school appropriate items.
3. Must be safe.
4. Give your game a name (*Ex: Crazy Pile Up Kickball*).
5. Write down clear and easy to follow rules (*think back to the Scientific Method, but don't go too crazy with 75 rules!*).
6. Submit a diagram of the layout of your game.
7. **Bonus:** Get your family to play it. Must have parent permission and must follow social distancing rules if incorporating others outside of your home (ex: neighbors, friends etc...).
8. **Double Bonus:** Record and submit a video on how to play the game. Must have parent permission and must follow social distancing rules if incorporating others outside of your home (ex: neighbors, friends etc...).
